 - Emergency Medicine: Academic Forum - 5/6/2025

Description:

Emergency Medicine: Academic Forum is a series that applies a robust, multifaceted learning approach for improved emergent patient care across the interdisciplinary team.

Series Objectives:

- 1 Content addresses management of complex emergency medicine cases using most recent evidence-based literature and best practices with emphasis on translating knowledge to clinical practice.
- 2 Perform clinical procedures using correct technique with higher success and fewer complications.
- 3 Utilize quality improvement and patient safety data and best practices to make significant changes to the clinical environment.
- 4 Develop and teach topics using effective educational methods to ensure engagement, understanding, and retention
- 5 Apply core Emergency Medicine knowledge to patient care.

Session Objectives:

- 1 Learn the key anatomical landmarks and structures involved in various nerve blocks, enhancing the ability to accurately identify target areas using ultrasound.
- 2 Gain proficiency in using ultrasound to visualize and evaluate joints, focusing on common sites such as the shoulder, elbow, wrist, hip, knee, and ankle.
- 3 Engage in collaborative discussions and peer reviews to share insights, validate findings, and learn from diverse perspectives, fostering a team-based approach to ultrasound diagnostics.
- 4 Develop the ability to quickly and accurately interpret a wide range of ultrasound images, including normal and pathological findings across various organ systems.
